SOME TYPICAL APPLICATIONS FOR E&K PRODUCTS

Abrasion-resistant parts and pads

Adhesives for polycarbonate, ABS, Fiberglass/resin composite and other plastics with dissimilar materials

Art objective and decorative plaque molds

Athletic track surfaces

Automotive ball joint lines, seals, spring and RIM parts including bumper parts and pads

Baseball core (soft ball)

Beer keg

Binder for aggregates

Bowling pins

Bridge deck restoration

Bumpers, guide blocks and pads used in launching landing devices

Bushings for moving parts and linkages

Cast industrial parts

Casting molds

Caulking compounds

Chemical resistant parts and coatings

Concrete molds

Concrete waterproofing

Conveyor belts and rollers

Core box liner

Couplings

Crack repair system for asphalt and concrete

Cushioning element in a composite railroad wheel

Cushioning pads used in the mounting of tractor treads

Design prototypes

Die blocks used for metal forming applications in automotive, aircraft and truck body industries

Encapsulation of electronic parts and telephone cable

Encapsulation of electrical components

Fibers (Spandex)

Flexible foam (low density, bun)

Flexible microceullular foams, self-skinning foams Foundry patterns and core boxes Furniture molds

Gears
Gaskets
Gym floor coatings

Hammer forms Highway repair (crack, spall and pothole) Helicopter landing pads

Industrial wheels and pads
Insulated materials (rigid foams, isocyanurate foams)

Mold materials

Magnetic tape coating

Pipe insulation, coating
Potting compounds for electrical components
Printing rolls (one component blocked isocyanate or two component system)
Production molds
Pothole repair

Railroad track end posts
Reenterable encapsulants
Replacement for rubber parts
Refrigerator, low K value foams
Road repair (concrete or asphalt, pu, epoxy and polyurea tech)
Rollers
Roof membrane waterproofing

Sealants for concrete, wood and asphalt
Sheeting used to protect areas subject to severe abrasion
Shock absorbing elements
Skateboard wheels
Skin molds
Ski racks
Shoe sole liner (high energy absorbing pad)

Snowplow blade edges Sound dampening pads Specialty coating

Telecommunication splice encapsulant
Tennis court surfaces
Tire filling elastomers
Tires and casters
Tire lining material
Torsion bushings for suspension systems
Traction drive belts

Universal joints seal Utility pole repairing material

Vibration mounting pads Void fillers

Washers and gaskets
Water based coating systems
Water proofing structures
Wear deck plates
Wheelchair wheel
